

UL/CSA Certified MPI Benches

The Magnaflux Magnetic Particle Wet Benches that you know and trust are now available with UL/CSA 61010-1 certification approved by a third party Nationally Recognized Testing Laboratory (NRTL). This upgraded design is available for equipment models: AD-2045, ADH-2045, D-2060, and D-2100.

Compliant with the Most Rigorous North American Electrical & Mechanical Safety Standards

- Units comply with UL 61010-1 and CAN/CSA-C22.2 No. 61010-1 standards.

Peace of Mind from Our Facility to Yours

- Each UL/CSA certified unit is shipped with an identifying UL/CSA sticker directly from the Magnaflux production facility.

New Safety Features to Protect Users during the Magnetic Particle Inspection Process

- Standard components have been upgraded for added protection. These components are now further guarded, insulated, and shielded.
- Unit is provided with Emergency Stop buttons which will shut off any in-progress magnetic current flow and dump air from the system to stop all movement.
- A shorter stroke on the headstock is used to avoid pinch points.
