The Sprayer that Moves with You

The 360° Sprayer on our WCP-2 White Contrast Paint and 7HF Magnetic Particle aerosol cans allows for a consistent spray pattern at any angle during nondestructive testing.

- Reduce downtime and minimize wrist fatigue or physical body stress by spraying the product from any angle without having to twist your body into hard to reach places.

- Improve inspection efficiency by evenly applying the product the first time because the 360° Sprayer won’t sputter and splatter when turned upside down like others.
WCP-2 White Contrast Paint Aerosol
